Northern Michigan University
• *Minors:* Art & Design and Film Studies

Experience:

Prime Digital Academy - Bloomington, MN   January 2016 - May 2016
Full Stack Software Development Student
Solo Project - Home Grown Gardens
• Developed a gardening application for home gardeners that have busy lives and want to keep a hobby garden. Gardens can take up a lot of time and need to have a plan and be organized.
• My application allows gardeners to track plants and keep information to help improve gardening techniques and future planning by organizing details for about their gardens and plants.
• *Technologies used:* HTML5, PostgreSQL, AngularJS, Node.js, Express.js, Angular Material, Passport
Group Project - Students Today Leaders Forever (STLF)
• As a non-profit, STLF, relies on gifts received from donors. To help keep funding consistent and help with retention the organization tracks gift information and has goals. Currently that process is done with Excel.
• We developed a web application that automatically pulls in the necessary information on donors and calculates metrics based on goals that easily created by an admin within the app.
• *Technologies used:* MEAN Stack (MongoDB, AngularJS, Node.js, and Express.js), HTML5, Bootstrap, Passport, Salesforce API
